SUMMARY

Fourth-year BS Information Technology student at Central Luzon State University with hands-on experience developing academic and software projects. Skilled in programming, database management, and software testing, with additional knowledge of data analysis and visualization. Motivated to build practical software solutions while continuously improving technical and problem-solving skills.

TECHNICAL SKILLS

Languages: PHP, JavaScript, TypeScript, Python, C, SQL
Frameworks & Web Technologies: Laravel, React, HTML5, CSS3, Bootstrap, jQuery
Databases & Data Visualization: MySQL, Supabase, Firebase, Pandas, Plotly, Bokeh
Tools and Testing: Git, GitHub, VS Code, Vite, npm, XAMPP, Postman, Figma, WordPress, FlutterFlow,

EDUCATION

Central Luzon State University 2023 – Expected 2027
Bachelor of Science in Information Technology *Science City of Muñoz, Nueva Ecija*
- **Relevant Coursework:** Computer Programming, Data Structures and Algorithms, Database Management Systems, Web Systems and Technologies, Systems Analysis and Design

CERTIFICATIONS

AWS Academy Graduate | Amazon Web Services and Training Certification — Oct 2026
Data Visualization using Plotly; Data Visualization using Bokeh | Coursera — Mar 2026
Creating Compelling Reports; Security and Connectivity Support; IT Customer Support Basics | Cisco — Apr 2026
Pandas; Data Visualization | Kaggle Learn — Feb – Mar 2026

PROJECTS

DARIS – Discipline and Reformation Information System
Laravel, PHP, MySQL, JavaScript, HTML, CSS | Team Capstone Project
- Developed front-end interfaces for a web-based information system designed to manage disciplinary cases, student records, notifications, and case workflows at Central Luzon State University.
- Developed the front-end using HTML, CSS, and JavaScript, integrated with a Laravel backend and MySQL database.

FinTrack – Personal Finance Dashboard
PHP 8, MySQL, jQuery, Bootstrap 5, Chart.js | Team Project
- Built a multi-role finance platform (client, financial advisor, administrator) for tracking income, expenses, investments, and bank and e-wallet accounts, with a six-month income vs. expenses chart.
- Implemented permission-based data sharing that lets clients choose what each advisor can see and revoke access at any time; secured queries with mysqli prepared statements and role-based page access.

MealMap – Meal Planning and Grocery Management App
React, JavaScript, Vite, Tailwind CSS, Supabase, Vitest | Personal Project
- Built a weekly meal planner, recipe collection, and pantry tracker with expiry and low-stock warnings, plus grocery lists generated from the meal plan that subtract existing pantry stock.
- Developed a pantry-to-recipe matcher that ranks recipes by ingredient match, with unit-conversion logic covered by Vitest unit tests.

CLSU Merit – GWA and Academic Honors Tracker
Python, Flask, Jinja, JavaScript, CSS, pytest | Ongoing Project
- Built a Flask web app and terminal app that calculate unit-weighted semester and overall GWA and classify academic honors from configurable rules.
- Added CSV import and export, CSRF protection, salted PBKDF2 password hashing, and 162 automated tests with pytest.

StudySync – Student Productivity App
React, TypeScript, Vite, React Router, Recharts | Personal Project
- Built a study workspace with task management, a weekly planner and monthly calendar with overlap warnings, a focus timer, and study-time progress charts.
